

THANK YOU

“To receive a new piece of equipment like this at no cost to us is a rare opportunity.”

DIANE GOVE

Every year, thousands of patients at Chinook Regional Hospital undergo a computerized tomography (CT) scan - trauma patients who have been in accidents, cancer patients who are undergoing surgery, patients who are suffering from broken bones, and so many others. A cutting edge CT scanner significantly enhances our ability to diagnose and treat our patients, who deserve nothing less. Donor contributions were paramount in being able to obtain the necessary equipment to meet the ever-changing demands of our community.
