

# THANK YOU

Behind every donation to the Chinook Regional Hospital Foundation, there are scores of people in the community positively affected.

A result of tremendous donor support, a SCIFIT Recumbent Bike was purchased for the Rehabilitation Department. This versatile piece of equipment not only aids in improving strength, flexibility and endurance but also impacts the patient's overall mental, emotional and physical health. The removable seat for direct wheelchair access makes this innovative bike more safe and easily accessible to those with spinal cord injuries.
